

## **FX Tutorial video**

### **FX Expertise at your fingertips all with a single log in on HSBC Singapore app.**

Whether you have a kid studying abroad, have an overseas mortgage, sending money to family or simply preparing to travel the world, now is one of the best times to do so with HSBC.

Our FX service is now integrated within the same HSBC Mobile app that you use to view your finances, invest and more, making it even more seamless and convenient.

You can manage your recent and past transactions more efficiently and repeat them with just a one touch access.

And with the FX Order Watch, the FX market never sleeps and we enhanced this FX facility to help create that seamless journey for you.

Once you set the target FX rate, we do the heavy lifting of tracking how it moves while you rest and put your time to use more effectively.

1. Log in & tap on either the 'Wealth' tab or the Pay and transfer' tab.
2. Select "Foreign exchange" and you can check the real time preferential FX rates.
3. To set up your target rate to set up FXOW / FX Rate Alerts, tap on "Set your target rate" and continue the journey; and if you wish to cancel FXOW / FX Rate Alert, and continue the journey.
